EXPERIENCE

Full-Stack Developer @Goldencorp

October 2020 - Present // Remote

I moved to a startup environment, where I had the chance to work on more challenging tasks, our main goal was to develop a mobile application that would help Algerian parents to find the best teachers to help their kids, using react native and elixir/phoenix to build optimized API, it was most involved as react/react-native developer, I opened up in new technologies and approaches like CI/CD and DevOps automation, as a Full-stack developer my responsibilities include:

- Developing the frontend using react and the latest technologies while keeping performance in check.
- Optimize and build new features using react-native.
- Develop intuitive, usable, and engaging interactions and visual designs for mobile.
- Developing features to enhance the user experience.

Front-end Developer @Orccloud

September 2019 to Oct 2020 // Algiers

Our main goal is to help clients to build their online presence by building websites using ORCLOUD cms , which is based on laravel framework, I had the chance to implement my front end skills to help reach the main objective, as a front end developer my duties were:

- Collaborate with the project manager to create a brand identity for clients.
- Determining the structure and design of web pages.
- Optimizing web pages for maximum speed and scalability.
- Maintaining brand consistency throughout the design.
- Make sure that the website work on all devices (Desktop, Tablet, Phone)
