## Summary

I am a skilled web developer with over 5 years of experience creating visually appealing and responsive web applications using React, Angular, React Native, and Node. I have worked with various web frameworks and libraries and have experience collaborating with agencies on projects in industries such as healthcare, education, and finance. I have a proven track record of understanding project requirements and delivering high-quality solutions that meet or exceed expectations. I am passionate about staying up-to-date with the latest web development technologies and trends, and continuously improving my skills to provide the best possible solutions. I am excited to take on new challenges and collaborate with agencies to create innovative web and mobile solutions.

## Experience

### Front-end Developer

Hotello

Aug 2022 - Apr 2023, Algiers - Contract (remote)

Technologies used: Angular, Ngrx, Rxjs, Scss, Git, Typescript, Jest, Jira, Jenkins, BitBucket

I moved to an enterprise environment, our goal is to build a cloud based property management software , which provides various features for hotel and hospitality management systems.

My duties:

- Developing new components using angular and writing tests (unit, integration, automated, etc).
- Optimize and build new features.
- Fixing bugs and collaborate with PO and QA team.
- Research and develop reusable npm libraries and angular components
- Developing features to enhance the user experience.

### Full-Stack Developer

Goldencorp

Oct 2020 - Aug 2022, Algiers - Full time (remote)

Technologies used: React, React native, Typescript, Material UI, Elxiir, Phoenix, Jira

I moved to a startup environment, where I had the chance to work on more challenging tasks, our main goal was to develop a mobile application that would help Algerian parents to find the best teachers to help their kids, using react native and elixir/phoenix to build optimized API, il was most involved as react/react-native developer, my daily tasks were:

- Developing the frontend using react and the latest technologies while keeping performance in check.
- Optimize and build new features using react-native.

- Develop intuitive, usable, and engaging interactions and visual designs for mobile.

- Developing features to enhance the user experience.

- Fixing bugs and build new features in the backend

### Front-end Developer

Orcldou

Technologies used: Vuejs, Scss, JQuery, Laravel blade.

Sept 2019 - Oct 2020 , Algiers - Full time

Our main goal is to help clients to build their online presence by building websites using ORCLOUD cms , which is based on laravel framework, I had the chance to implement my front end skills to help reach the main objective, as a front end developer my duties were:

- Collaborate with the project manager to create a brand identity for clients.
- Determining the structure and design of web pages.
- Optimizing web pages for maximum speed and scalability.
- Maintaining brand consistency throughout the design.
- Make sure that the website work on all devices (Desktop, Tablet, Phone)
